

Value & Beyond

From humble beginnings in 1995, **Blue Volt Services** has grown from strength to strength to become a pioneer in the fields of electrical contracting, electrical panels. BMS./BAS works, maintaining air-conditioning, refrigeration services and facility management. Our ability to provide world-class service at extremely competitive price has resulted in a large happy client base across South India.

Advantage Blue Volt Thoroughbred Professionals

The single largest factor for our superior service is our team. **Blue Volt** is powered by a team of professionals who are as qualified as they are experienced. **Blue Volt's** philosophy of constant development ensures that our team undergoes training on a regular basis to provide flawless execution and support to all customers.

Quality Policy

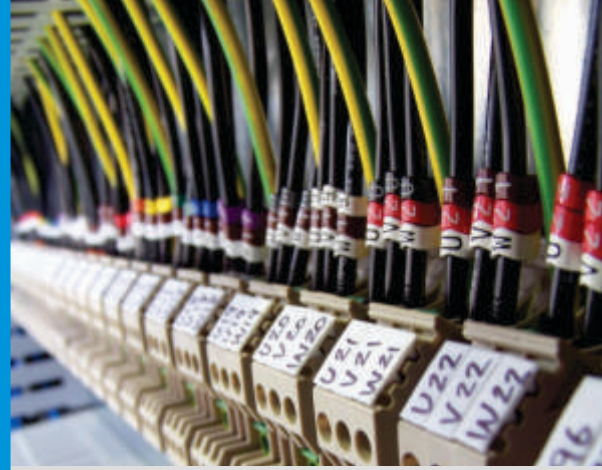

Quality at Blue Volt goes beyond theory and paper-work – It is a way of life for us. Since our inception, our unflinching commitment to quality has resulted in providing services that are truly world class. Irrespective of the size or nature of our projects our stringent quality policy ensures that our customers are, without a doubt, delighted.

Infrastructure

In addition to the thoroughly professional personnel and ruthless adherence to quality, the **Blue Volt** advantage includes our infrastructure. Located in the heart of Bangalore business district our 3700 sft workplace is equipped by state of the art machinery that can handle projects in an efficient and uninterrupted manner. Blue Volt also has the advantage of our fully loaded fleet of service vans that are constantly ready to be deployed at very short notices across locations.

Customer Focus

Never mind the above mentioned advantages, if there is a reason above all for our unprecedented growth over the years, it has been our ability to stay fiercely focused on our customers.

SERVICES

Electrical Contracting

Blue Volt offers superior quality Electrical Contracting Services to customers across Bangalore at extremely reasonable prices. Handled by highly experienced professionals, our range of services successfully fulfills the needs and requirements of customers and complies with national and international quality standards.

Electrical Panels

Blue Volt offers high performing Electrical Panels such as MCC, PCC, PMCC, DDC Control Panels, VFD by Pass Starter Panels and Control Solutions for HVAC, ACMV, and Electrical. These are made using good quality raw materials (like ABB, Siemens, Schneider, and L&T) and modern machines following international and quality standards. Our range of Electrical Control Panels is reliable, durable. We also provide the option of custom designing these panels based on the requirements of clients. These are available for different areas like cold rooms, precision air conditioning and comfort cooling.

BMS/BAS Services

Blue Volt offers supreme quality BMS/BAS services at competitive prices. These services strictly comply with national, international, and other certified quality standards. We are experts in the systems of Siemens, Trane, and Johnson make BMS controllers.

Maintenance of Air-conditioning & Refrigeration.

Blue Volt offers Maintenance Services for Air-conditioning and Refrigeration to our clients. We take Plants AMC with compressive and non compressive.

Facility Management

Blue Volt's offering includes Facility Management such as Annual Maintenance for electrical Appliances like Air-conditioning, Refrigeration, and other products. Our range of Facility Management Service caters MEP (Mechanical, Electrical, and Plumbing) solutions.

Other Services

We do import Electrical Enclosures and controller.

We are the authorized dealer for SoftHard Automation Microprocessor based motor protection devices (MPD), Voltage Protection Devices (VPD), Sequential controllers.

ISHRAE Member Since 1997

Corporate Social Responsibility (CSR)

Blue Volt, as an organisation, believes in giving back to the community for all the support and encouragement we have got from them over the years.

As part of our corporate social responsibility, we undertake a variety of work that include providing school uniforms for children of families living below the poverty line and we also provide technical training along with a stipend for these children.
